OBJECTIVES To work on meaningful projects which solve people's problems.

EDUCATION **Kazan Federal University** *Sep 2006 - Jun 2011*
Applied Mathematics and Computer Science

EMPLOYMENT **Lead Ruby on Rails developer** *Oct 2012 - Present*
Flatstack, LLC *Kazan, Russia*

As a lead developer I am responsible for managing the development of several Rails-based websites of various size and complexity. This includes: coding, performing code reviews, mentoring junior developers and making architectural decisions.

Also my role includes participating in development of the company's style guides and project templates, speaking on weekly demos about new technologies which can help the team in everyday work.

Ruby/Clojure developer *2011 - Present*
FOSS Labs (part-time job) *Kazan, Russia*

Building various web scrapers and parsers using Ruby and Clojure.

Ruby on Rails developer *Dec 2011 - Oct 2012*
Flatstack, LLC *Kazan, Russia*

C++, C#, Ruby on Rails developer *May 2011 - Dec 2011*
Team Rocket Science (branch of FIX, LLC) *Kazan, Russia*

Provided support for legacy C++ application. Wrote C++ extension for Google's CityHash library. Built several plugins for Redmine including a service for synchronization between Redmine and MS Project.

C++, Delphi lead developer *May 2011 - Dec 2011*
FIX, LLC *Kazan, Russia*

Designed and built several networking apps for Windows in a team of 2 developers. Was responsible for maintaining the core part of applications and mentoring junior developers.

C++, Delphi developer *Nov 2008 - May 2011*
FIX, LLC *Kazan, Russia*

Built desktop applications and services for Windows.

TEACHING
EXPERIENCE

Kazan Federal University

Fall 2013

Higher Institute of Information Technologies and Information Systems

Course of lectures on SaaS and Ruby On Rails for 3 year graduate students.
Based on Berkley's course "Software as a Service" CS169.1x

TECHNICAL SKILLS

- **Ruby/Rails:** 3.5 years. Went through dozens of startups during my work at FlatStack. Built several Rails apps from the ground up to production release. Worked on legacy Rails codebases and refactored a lot of them.
- **JavaScript:** 3 years. Experienced with client-side JavaScript in Rails apps. Worked on building rich client applications using CoffeeScript and Backbone.js.
- **Clojure:** 1 year. Built several web scrapers and API clients using Clojure. Have several contributions to leiningen.
- **DevOps:** 3 years. Worked on different deployment stacks/services: Amazon EC2, Heroku, DigitalOcean, EngineYard. Used Capistrano for deploying Rails apps. Wrote Chef recipes for setting up a server for deployment of web applications written in Rails or Clojure.
